REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **11-20** are allowable over the prior art of record because the prior art does not teach or suggest a method of producing a I-III-VI_y compound in thin film form by electrochemistry, in which y is close to 2, VI is an element comprising selenium, I is copper, silver or gold and III is boron, aluminum, gallium, indium or thallium, comprising the steps of (a) providing, (b) applying and (c) regenerating as presently claimed, esp., the step of regenerating the selenium in active form in the electrolysis bath.

The prior art does not contain any language that teaches or suggests the above.

Nakamura et al. teaches the electrodeposition of Cu-In-Se films with an aqueous solution containing CuCl₂, InCl₃ and SeO₂ (abstract). *Nakamura et al.* do not teach regenerating the selenium in active form in the electrolysis bath.

Wang et al. teaches that Se can be re-oxidized to Se(IV) by H₂O₂ (abstract). *Wang et al.* do not teach electrolysis or an electrolysis bath.

Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled
